Slush 2026 — Volunteer
ESN Savo — Board Support Member

DRIVER'S LICENSE

Category B (passenger car)

ABOUT ME

IT student at the University of Eastern Finland and full-stack web developer based in Helsinki. I build fast, interactive websites with React, Next.js, Tailwind CSS and Three.js, and founded NORDASH, a digital agency delivering real projects for real clients. Hands-on background in remote web development and in hospital IT and network support, plus customer-facing work in Finland that sharpened my communication and teamwork. Looking for an IT or data traineeship where I can learn fast and contribute from day one.

IT EXPERIENCE

Founder & Full-Stack Developer
NORDASH, Helsinki | *Jun 2026 – Present*

- Founded a full-stack digital agency building modern, high-performance websites for small businesses and startups
- Built the agency platform with Next.js, React, Tailwind CSS, Framer Motion and Three.js, with a MongoDB backend, CRM dashboard and lead management; deployed on Vercel
- Wrote the product requirements document (PRD) defining services, structure and user flows
- Own the full process from design and development to deployment and client communication

IT Developer
DEVSiNC (Remote), Lahore | *Jul 2025 – Apr 2026*

- Managed and updated company websites, ensuring functionality and content accuracy
- Developed client websites to specification across design, updates and ongoing maintenance
- Collaborated with team members using development tools and Git version control

Network System Specialist (Intern)
Hameed Latif Hospital, Lahore | *Mar 2023 – Jun 2023*

- Helped maintain the internal network doctors and staff use to access patient records and hospital systems
- Supported troubleshooting, system configuration, connectivity issues and workstation setup, keeping daily IT operations reliable

OTHER EXPERIENCE

Sandwich Artist
Subway (Sodexo), Aalto University, Espoo | *Aug 2026 – Present*

- Operate the POS system, handle daily sales and manage stock levels, inventory checks and sales data entry
- Deliver fast, friendly service in a high-volume campus environment, following Finnish food safety standards

Student Tutor
University of Eastern Finland, School of Computing | *May 2026 – Oct 2026*

- Compiled introductions from 12 tutors into the Smart Start Guide; set up WhatsApp and Telegram groups
- Supported new international students with housing, arrival logistics, studies and student life

Fundraising Representative
World Vision Finland & Save the Children Finland | *Jul 2026 – Sep 2026*

- Face-to-face fundraising in Helsinki; built trust quickly and signed up long-term monthly donors in a target-driven team

Chairperson
Chanan Development Association (CDA), Pakistan | *Sep 2021 – Sep 2025*

- Rose from Executive Committee member to Chairperson, leading events, projects and volunteer teams
- Responsible for decision-making, team management and successful delivery of community programmes

Truck Dispatcher
Pioneer Enterprises & Acumen Enterprises (U.S. freight, remote) | *Jun 2023 – Aug 2025*

- Managed daily freight operations with DAT Load Board and RingCentral: route planning, real-time driver tracking, rate confirmations and dispatch records

Data Entry Specialist
Onestop Grocery Store, Lahore | *Jun 2022 – Feb 2023*

- Recorded daily sales, inventory, pricing and stock data accurately in the IPOS system

PROJECTS

BubbaCoin (BUBBA) — ERC-20 Blockchain Token | *UEF course project, May 2026*

- Designed and deployed a custom ERC-20 token on Ethereum Sepolia; 1,000,000 BUBBA minted and publicly verifiable on Etherscan (Solidity, Hardhat, ethers.js, MetaMask)

StudySync — Study-Partner Web App | *UEF team project, May 2026*

- Frontend lead in a 7-person team: built all 7 pages incl. course-based partner matching, real-time chat and campus events (React 19, React Router, Firebase Auth, Firestore)
